**EXHIBIT A
SCOPE OF SERVICES**

**DALLAS NORTH ESTATES No. 5 – STREETS RECONSTRUCTION
PROJECT No. 6653**

PROJECT DESCRIPTION:

Reconstruction of the concrete street pavement and replacement of the existing 6” water main at the following locations:

- Northridge Drive (~1300 LF) - between Springbrook Drive and Ridgefield Drive,
 - Oakhill Drive (~1200 LF) - between Springbrook Drive and Ridgefield Drive,
 - Potomac Drive (~1000 LF) - between Springbrook Drive and Ridgefield Drive,
 - Quill Drive & Ridgefield Drive (~2100 LF) - between Springbrook & Meadowcrest Drive.
1. The street paving shall be 27-ft. back-to-back, 6-inch 3000 PSI reinforced concrete pavement on 6-inch lime stabilized subgrade per City of Plano Standard Construction Details. No pavement structure design will be performed. No geotechnical testing will be performed to determine if special design considerations should be employed.
 2. Existing driveways will be reconstructed within the project limits per City details.
 3. Existing sidewalks including barrier free ramps will be reconstructed within the project limits per City details.
 4. The existing water main is to be replaced where it is under the proposed pavement reconstruction and shall include replacement of existing water services. Fire hydrant coverage will be analyzed and improved to current standards if necessary. Existing fire hydrants will be replaced with the existing fire hydrants being turned over to the City.
 5. The project will include curb drainage capacity analysis but will not include upsizing of the existing storm sewer except on Quill Drive, if needed. Addition of inlets will be included where gutter capacity is exceeded. If desired by the City, the design will include manholes for access into the existing storm sewer within the project limits. The approximate location of the existing storm sewer will be determined using “as-built” plans and from surface features. No subsurface investigations will be performed to determine the actual location of the existing storm sewer.
 6. No additional ROW or easements are anticipated to complete the project.

BASIC SERVICES:

A. Design Standards

1. This project shall be designed in accordance with the following:
 - Geodetic Monumentation Manual
 - Manual for Right-of-Way Management
 - Storm Drainage Design Manual
 - Erosion & Sediment Control Manual
 - Thorough Fare Standards Rules & Regulations
 - Manual for the Design of Water & Sanitary Sewer Lines
 - Standard Construction Details

2. All plans submitted to the City shall be signed and sealed in accordance with state law.
3. The City shall provide guidance regarding project specific design issues if needed.

B. Research and Data Collection

1. Meet with City of Plano engineering staff and obtain design criteria, pertinent utility plans, street plans, plats and right-of-way maps, existing easement information, and other information available for the project areas.
2. Meet with the City of Plano project manager and conduct an on-site review and walk through.

C. Design Survey

1. Establish a horizontal and vertical control network and project control baseline for the project area. The network and baseline are to be tied into the existing City of Plano control network.
2. Establish horizontal and vertical project control monumentation.
3. Tie rights-of-way lines and corners that can be found via pin finder, property lines and corners/monuments, building, fence lines, trees 4-inches in diameter and larger, edges of pavements and all other visible surface features to the project control baseline. Existing visible above ground utility features shall be located and referenced by utility name (i.e. Oncor Electric, Verizon Telephone, Atmos Gas, etc.).

4. Vertical topographic information tying pavement, manholes (tops and inverts), storm drain inlets (tops and inverts), and other improvements as needed within the project areas for the design.
5. Sufficient survey data shall be obtained so that a detailed Digital Terrain Model (DTM) may be prepared to provide existing and proposed grade cross sections at a fifty-foot (50') interval relative to the project baseline. Cross sections are for project design review and quantity takeoffs and may not be a part of the final construction plan set.
6. Topographic survey and cross section work shall extend approximately 50 feet lengthwise beyond the proposed construction area and approximately 10 feet beyond the ROW. Additional data more than 10 feet beyond the ROW may be needed for lead walks.
7. When underground utilities are exposed, tie to project control baseline.

The drainage analysis will include evaluation of street and inlet capacities for compliance with current City standards as set forth in the City's Storm Drainage Design Manual. Hydraulic analysis of existing storm drain system will be confined to existing project limits. Starting hydraulic grade elevations shall be based on existing as-built plans or other reasonable assumptions confirmed by the City. If hydraulic analysis is required outside of the projects limits, it shall be done by contract modification. (This information will be prepared but only included in the plans if improvements are required. If required, it will be included by a contract modification)
 - Storm drains improvement plan and profile sheets (if required). (Scale 1"= 20'H; 1"=5'V). (These improvements will be included if shown to be required as a result of the drainage area maps/drainage calculations. If improvements are required, the design/plan preparation shall be done under a contract modification for all streets except Quill Drive)

- Water Utility Replacement Plans (Plan Only) (Scale 1"= 20').
- SWPPP sheets meeting TCEQ and City of Plano requirements. Scale 1"= 40'. Include the City WORD file form, "City of Plano CIP Projects – SWPPP Operator Requirements" as a sheet in the plans as part of the SWPPP. Include erosion control details from City Standards as required.
