COUNCIL AGENDA ITEM**

List of Supporting Documents: Recommendation of Award Memo, Sole Source Memo, Resolution and Agreement	Other Departments, Boards, Commissions or Agencies

Date: April 6, 2012

To: Sharron Mason, Purchasing

From: Susan Carr, PSC

Ref: Sole Source purchase Recommendation Memo

Public Safety Communications recommends the purchase of the Stratus ft6300 fault tolerant server as a sole source purchase from TriTech Software systems.

As outlined in the previously provided sole source letter and e-mail, TriTech is an authorized reseller of the Stratus ftServer hardware and Stratus ftServer annual support and maintenance services. Based on the specific configuration used for the VisiCAD dispatching system, TriTech and Stratus have developed a unique implementation and maintenance program that is only available for Stratus ftServers and support sole sourced through TriTech. Unless purchased in this manner, TriTech software cannot predict the level of effort to perform the work, and utilizing another reseller increases client (COP) costs, Tri-tech costs, and incurs further system downtime. System downtime translates to having to manually write down all emergency calls for services, manually look up addresses, and manually dispatch the appropriate resources. This could lead to delays in responses to emergency situations.

Cost of the equipment, configuration, shipping and implementation of the server in the amount of \$79,700 will be paid out of the TS (technology) fund. PSC will be paying for the annual maintenance in the amount of \$11,500 (which shows as 24x7 assurance support on the quote).

No other alternatives were considered as we have previously purchased our equipment through TriTech, knowing the reliability of the purchase. The impact of not purchasing as a sole source through TriTech is listed above in increased costs, potential extended down time and delay of response to City of Plano citizen emergencies, as well as impact to first responders.

Re: TriTech Software and Software Support Sole Source

Dear Amy,

TriTech Software systems is the developer and exclusive provider of our VisiNet suite of software applications (computer aided dispatch, mobile data, Law records management, interfaces, and related modules and documentation), and the exclusive provider of support for the TriTech applications. TriTech's applications are proprietary to TriTech, and no other service providers / vendors are currently authorized by TriTech to provide support services.

Should you have any further questions, please do not hesitate to contact me directly at 858.799.7372, or via e-mail at roxanne.lerner@tritech.com.

Sincerely,

Re: Stratus ftServer & annual Support/Maintenance Scope

Dear Mrs. Johnson:

The City has expressed a desire to purchase a Stratus ftServer as an upgrade to the City's TriTech VisiCAD computer aided dispatch system. As you are aware, TriTech is an authorized reseller of Stratus ftServer hardware and Stratus ftServer annual support and maintenance services. TriTech has been providing Stratus' fault tolerant server solutions for our clients' mission critical systems for several years and is certified by Stratus for server configuration and installation.

Based upon the specific configuration used for the VisiCAD Command dispatching system, TriTech and Stratus have developed a unique implementation and maintenance program that is only available for Stratus ftServers and support sole sourced through TriTech. This program commences with the specification of the hardware, continues through the coordination of installation services from the two organizations and culminates with the coordinated support services provided by our respective 24x7 call centers.

As a part of this project Plano will receive Stratus's total assurance services for comprehensive support and maintenance on the Stratus ft6310 server. This support plan features uptime guarantee, vendor collaboration, full operating system support, 24/7 engineer response to a critical call with minutes, around the clock root-cause problem determination and uptime assurance software subscription. If a critical availability problem arises, management escalation brings it to the attention of Stratus executives ensuring that the right resources are at work on the most rapid resolution possible.

- 1.1 The Contractor shall obtain and maintain the minimum insurance coverage set forth in this section. By requiring such minimum insurance, City shall not be deemed or construed to have assessed the risk that may or may not be applicable to the Contractor. The Contractor shall assess its own risks and if it deems appropriate and/or prudent, maintain higher limits and/or broader coverage. The Contractor is not relieved of any liability or other obligation assumed or pursuant to the Contract by reason of its failure to obtain or maintain insurance in sufficient amounts, duration, or types. The insurance requirements listed below do not replace any warranty or surety (performance, payment, or maintenance) bonds if required by preceding or subsequent sections of this contract.
- 1.2 Contractor shall cause each subcontractor employed by Contractor to purchase and maintain insurance of the type specified herein or cover such subcontractors under its insurance coverage.

Failure of the Contractor to fully comply with requirements of this section during the term of the contract will be considered a material breach of contract and will be cause for immediate termination of the contract at the option of City.
